Description Reviews (0) Additional information

Kratom (Mitragyna speciosa) Plant Material

This product consists of parts of the Kratom plant (Mitragyna speciosa), including leaves and other botanical components. It is offered in various physical forms—whole pieces, crushed material, or finely milled powder—with a particle size of ≤ 600 microns.

The Kratom plant is known for its traditional and pharmaceutical applications, primarily due to the presence of active alkaloids such as mitragynine and 7-hydroxymitragynine. These compounds are researched for their potential in supporting mood, energy, and pain management.
